

“ I wanted to share with you that during our summer orientation program for freshman we used Sam's Story DVD during the Health and Safety presentation. The story touched many students and parents and I truly believe has made a difference. It appears to have changed the attitude of many incoming freshman and their parents, that this would never happen to me. Many parents came up to me after my presentation to share how the DVD made them and their son or daughter look at the bigger picture on how alcohol use/abuse can affect their lives. Sam's story reached 1,550 students and 1,380 parents during the orientation. When the students return for welcome weekend, each will given the Sam Spady wallet card.

I want to personally thank you for your courage in turning a very personal loss into something that I am sure will make a difference in many other families lives. If there is anything that I may ever do to assist you and the foundation, please do not hesitate to ask. ”
